LAUNDRY DETERGENT

**FREE OF DYES
& PERFUMES**

The first detergent **CERTIFIED asthma & allergy friendly®** by the Asthma and Allergy Foundation of America

Why is the AAFA Certification so important?

Dedication to safety and testing is the key difference in our Free & Clear formula. No other detergent on the market has met the stringent testing standards put forth by the Asthma and Allergy Foundation of America including:

1. Full chemical constituent review and testing to ensure that: any chemicals with sensitizing properties are either absent or present at suitably low level – VOC emissions are low – assessing airborne pathway or exposure as well as dermal pathway – a fabric washed with the detergent does not have residual chemicals above specified limits.
2. Detergent must be non-fragranced and contain no dyes or optical brighteners.
3. Detergent was challenged with allergen-containing test dust and with live house dust mite infestation, to ensure detergent can reduce bio-allergen by over 95% and that there was no resurgence of dust mites one week after washing.

Scan this code to learn more about our **aafa** certification and testing protocols.

**Tough on Odors and Stains.
Gentle on Skin and Fabric.**

#1 Choice for Sensitive Skin
Neutral pH formula, with no added dyes, perfumes or brighteners eliminates the risk for skin irritations caused by harsh laundry detergents.

99% Allergen Removal
Independently tested and certified to ensure detergent reduces pet and dust-mite allergens by 99%.

Total Odor Elimination
Eliminates the foulest odors encountered in commercial laundry settings including body odor and urine.

Complete Stain Removal
Powerful yet gentle on fabrics to remove the toughest set-in stains including makeup, suntan lotion, coffee and chocolate.
